

## Project Part 1

**Team:** Tyler Bussell, Anna Podoplelova, Patrick Severy, Ryan Tabler

**Title:** *Choreganizr*: A Roommate Chore Management Application

**Description:** An application that allows roommates to delegate, coordinate, and track chores in a household.

**Platform/Environment:** Windows/Linux/Mac application, with Apache backend

**Programming Languages:**

Language	Tyler Bussell	Anna Podoplelova	Patrick Severy	Ryan Tabler
Java	Beginner	Beginner	Beginner	Intermediate

### Functionality:

- Users can sign up
- Users can log in
- Users can join group with other users to create a “house”
- Users can create new chores
- Users select from premade list of chores that apply to the house
  - The app automatically delegates chores fairly based on a rating of how unpleasant the chore is
- Users can assign chores to other members of house

### Stretch Functionality:

- Email and or text alerts
- Extend for Family use (Mom/Dad roles, children roles)
- Rent payment tracker
